

NEA 560 COMPACT

Dense Phase Low Pressure

The NEA 560 COMPACT powder pump transports large amounts of powder from one location to another. The pump design and the small diameter suction and delivery tubing used with the pump allow it to be purged quickly and thoroughly. The pump is more efficient than traditional venturi-style pumps in that very little of the air that is used to operate the pump is mixed into the powder stream. Only the air that is used to move the powder out of the pump and into the delivery tubing enters the powder stream.

FLOW RATE:	Up to max 6 Kg/min
ASPIRATION TUBE:	Up to max 6 mt
TRANSPORT TUBE:	Up to max 30 mt
SELF CLEANING:	Included
SUPPLY:	6 bar
